**Bridge Abutment Design**  
**Softball Backstop Fence Footings**  
**Construction Observation**

Projects don't always need to be big to be important to our client's!

Pillar Consulting Group provided civil engineering services to the contractor for several pedestrian bridge approaches and abutments on short notice to maintain a tight construction schedule. We worked with the prefabricated bridges and existing site layout to develop an economical solution that could be permitted and built quickly.

Several other footings were designed for an adjacent softball field backstop to support the project site development as well.

**CIVIL**
