Pillar's Responsibilities:  
***Structural Engineering***  
***Building Layout & Design***  
***Code Study***  
***Energy Code Compliance***  
***Fire Protection Coordination***  
***Utilities & Lighting***

This 75,000 SF facility includes manufacturing, warehouse and office space. The manufacturing involves packaging and mixing flammable liquids. The warehouse is configured for high-piled combustible storage in both pile and rack configuration. Office space is for sales and administration.

Pillar Consulting Group performed a code study to address the significant quantity of class IB flammable liquid stored and handled at the facility as well the unique mix of products stored. The facility was built per FM Global design standards.
