

# ANIMAL TEACHING FACILITY

OREGON STATE UNIVERSITY, CORVALLIS, OR

Pillar Consulting Group is the civil engineer-of-record for the Oregon State University Oldfield Animal Teaching Facility, located on campus in Corvallis, Oregon. Site development required widening and improvements of 871 lineal feet of SW 35th Street, a major public arterial roadway. Since this project was the first in a large planned expansion of agricultural teaching facilities, master planning for stormwater conveyance, detention and water quality for over 15 acres of property was necessary, in addition to the detailed design of the parking lot and building facility site.
