

SSIP Rail Siding

Shutler Station, Oregon

Project Type:
**Industrial Railroad Siding
Public Works Project**

Size:
**Approximately 5,400 LF of siding,
Project Value: \$1.0 M (approx.)**

Client:
Gilliam County

Pillar's Responsibilities:
Project Management

This 5,400 lineal foot industrial railroad siding is part of a developing wind distribution center located at the Shutler Station Industrial Park (SSIP), south of Arlington, OR.

Pillar Consulting Group, Inc. provided project management, acting as the owner's representative. Responsibilities included coordination of design submittals, coordination of the public bidding process, contract award, construction management, cost tracking and project close-out.

This project was funded largely by a Connect Oregon grant administered by ODOT, and it was subject Oregon public contracting law.

Project Management
