

# Loading Dock Addition

Albany, Oregon

Facility Type:

**Industrial**

Project Scope:

**Enclose Existing Exterior Loading Area**

**Provide for Covered Loading Dock**

Client:

**Pacific Cast Technologies**

Pillar's Responsibilities:

**Civil Engineering**

**Structural Engineering**

Pacific Cast Technologies' needed a better solution for shipping and receiving. The current operating procedure was to park trucks near a covered area along the building and use fork lifts to remove items. This was no longer good enough.

Pillar Consulting Group was hired to work around the existing building, parking lot layout and civil infrastructure to develop a plan for a loading dock that would work for the largest of trucks that comes to the plant.

Space was tight, but Pillar Consulting Group was able to provide a solution to enclose the existing covered area, and provide a loading dock and covered entry area while allowing trucks the needed space to maneuver.
