

Metals Casting Facility

Linn County, OR

Square Footage:
28,100 SF

Project Construction Cost:
Confidential

Structural System:
Pre-engineered Metal Building

Pillar's Responsibilities:
Building Design
Fire and Life Safety Code Review
Civil Engineering
Structural Engineering

Pillar Consulting Group was the Engineer-of-Record for the expansion of an investment casting facility. Pillar was directly responsible for the building code analysis, building and site layout, structural engineering, civil engineering and related project management and coordination of this project. The overall project included a number of smaller, related ancillary projects including a boiler building, process equipment platform, furnace blast walls, car bottom furnace foundations, general facility pipe bridges and extensive site work which included a new, large stormwater quality pond.
